SUMMARY

Product-focused technology leader and MBA candidate at IIM Ahmedabad with 8+ years of experience architecting and scaling high-throughput distributed systems for search, relevance, and consumer-facing platforms at Microsoft, Amazon, and Flipkart. Proven track record of driving measurable business outcomes - 20% latency reduction, 99.95% uptime, and \$40B business impact - while leading cross-functional teams across e-commerce, enterprise software, and gaming.

EXPERIENCE

Flipkart, Bengaluru, KA, IN — SDE 3 Nov 2024 - Present

- Cross-collaborated with product, design, and business teams to launch Flipkart Grocery on the Shopsy app, successfully expanding high-quality grocery accessibility to Tier-2 and Tier-3 cities.
- Architected high-throughput search and pricing pipelines serving 10M+ daily active shoppers, applying SOLID design principles, strict API contract design, and automated retry throttles to cut data ingestion latency by 20% while strengthening cross-service observability.
- Owned reliability of a tier-1 core shopping service, maintaining 99.95% uptime during peak traffic and reducing MTTR through proactive monitoring and alerting to protect the customer experience.
- Launched and trained production ranker models utilizing advanced feature engineering to optimize search relevance, resulting in a 15% increase in search accuracy and an 8% lift in checkout conversion rates.
- Integrated an LLM into the production search path to generate real-time query suggestions, enriching search intent signals while keeping latency overhead under 5ms across 10M+ daily active shoppers.
- Mentored and coached 4 mid-level engineers, guiding them on system design patterns, coding standards, and project ownership to accelerate their promotion to the next technical level.

Amazon, Bengaluru, KA, IN — SDE 2 Aug 2021 - Nov 2024

- Shipped semantic search using the Lucene KNN algorithm to surface relevant products across all Amazon locales, improving search relevance and click-through rates by 20% for buyers.
- Developed and deployed search solutions for the Product Search division, built directly on Apache Lucene.
- Launched Video Search as part of a US market initiative, surfacing relevant video results in a dedicated tab alongside product results.
- Created a query-replay-based solution for hyper-parameter optimization of Machine Learning algorithms, tuning relevance models across seven global marketplaces.
- Launched advanced filter selection frameworks, reducing zero-result searches by 10% so customers find products faster.

M56 Studios (Creative Labs, CAA), Bengaluru, KA, IN — Senior Software Engineer Oct 2020 - Aug 2021

- Led product development of a consumer React Native app, lifting user engagement by 30% through iterative product improvements.
- Built custom SVG visualizations and Express-backed APIs, improving frontend performance by 30% to strengthen user retention.

Zynga Games, Bengaluru, KA, IN — Software Engineer Mar 2020 - Oct 2020

- Shipped core game levels for Willy Wonka Slots, contributing to a 4.2 Google Play rating and 1M+ installs.
- Ran A/B and EOS experiments on feature variants, using player data to increase gameplay retention.
- Increased player lifetime value by 15% through targeted gameplay and progression enhancements.

Microsoft, Hyderabad, TL, IN — Software Engineer Jun 2015 - Jun 2017

- Architected scalable microservices for a \$40B volume licensing business, accelerating billing workflows and improving the licensing customer experience.
- Delivered automation for certificate management and BCDR, saving ~20 engineering hours weekly and reducing operational risk.
- Partnered with business stakeholders to analyze sales data with Azure ML, informing discount and pricing decisions.

EDUCATION

Indian Institute of Management Ahmedabad, Ahmedabad, GJ — Master of Business Administration (Blended) 2024 - 2026

GPA: 3.42, Relevant Coursework: Data Analytics, Financial Analysis, Strategic Management, Marketing Management

University of Southern California, Los Angeles, CA — Master of Science (Computer Science) 2017 - 2019

GPA: 3.43

Thapar Institute of Engineering and Technology, Patiala, PB — Bachelor of Engineering (Computer Science) 2011 - 2015

GPA: 9.24

PROJECTS

ColorsMultiplayer — Flutter

- Designed and built a Flutter mobile game for turn-based, Candy Crush-style play against an AI opponent, owning product concept, game logic, scoring, and UI.
- Shipped an in-game hint system that guides players during matches, improving usability and player engagement.

SKILLS

Product & Business: Technical Leadership, Cross-functional collaboration, Stakeholder management, Problem solving, Process improvement, Execution, Analytics

Frontend & Mobile: React, React Native, Kotlin, Android, Swift, Flutter, HTML, CSS, Angular

Languages: C#, Python, Java, JavaScript, Scala, PHP

Cloud & Infrastructure: Kafka, RabbitMQ, AWS Lambda, Azure Functions, AWS S3, EC2, SNS, Redis, Docker, Kubernetes, Google Cloud Services, Microservices, CI/CD

Data & Search: Apache Lucene, Microsoft SQL Server, MongoDB, PostgreSQL, Elasticsearch

Backend & Frameworks: Express, REST APIs

Other: System Design, Distributed Systems, Software Architecture, Observability, Performance Optimization, Reliability Engineering, Design Patterns
